Crowned Ridge proposes to construct a wind energy conversion facility to be located in Deuel, Grant, and Codington Counties, South Dakota (Project). The Project would be situated within approximately 60,996-acres in the townships of Waverly, Kranzburg North, Kranzburg South, Troy, Rome, Goodwin, and Havana, South Dakota (Project Area). The total installed capacity of the Project would not exceed 301 megawatts (MW) of nameplate capacity. The proposed Project includes up to 132 wind turbine generators, access roads to turbines and associated facilities, underground 34.5-kilovolt (kV) electrical collector lines, underground fiber-optic cable, a 34.5-kV to 230-kV collection substation, two permanent meteorological towers, and an operations and maintenance facility. The Project will utilize the Crowned Ridge Wind II 5-mile 230-kV generation tie line and the Crowned Ridge Wind II collector substation to transmit the generation to the dead-end transmission structure adjacent to the Crowned Ridge Wind, LLC project's collector substation and conjoined to the Big Stone South 230-kV Substation, which is owned by Otter Tail Power Company. Applicant has executed a purchase and sale agreement with Northern States Power Company (NSP) to sell NSP the Project and the Facility Permits once constructed. The Project is expected to be completed in 2020. Applicant estimates the total cost of the Project to be \$425 million.
