

**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF SOUTH DAKOTA**

IN THE MATTER OF THE REQUEST OF)	ORDER GRANTING
MIDSTATE TELECOM, INC. FOR)	CERTIFICATION
CERTIFICATION REGARDING ITS USE OF)	
FEDERAL UNIVERSAL SERVICE SUPPORT)	TC08-066

On May 23, 2001, the Federal Communications Commission (FCC) released an Order concerning the federal universal service support mechanism for rural carriers.¹ This Order (hereafter referenced as the "Fourteenth Report and Order"), in part, codifies at 47 § C.F.R. 54.314, a requirement for States to provide a certification regarding federal universal service support that is received by rural incumbent local exchange carriers and/or eligible telecommunications carriers providing service in rural service areas. Pursuant to such rule, a state that desires rural carriers within its jurisdiction to receive future federal universal service support must file an annual certification with the FCC and the Universal Service Administrative Company (USAC) stating that federal high cost support provided to such carriers within that State will be used only for the provision, maintenance, and upgrading of facilities and services for which the support is intended. This certification requirement applies to various categories of federal universal service support, including support provided pursuant to 47 C.F.R. §§ 54.301, 54.305, and/or 54.307, and/or 47 C.F.R. Part 36, Subpart F (high-cost loop support, local switching support, safety net additive support, and safety valve support). Support provided under these FCC rule provisions will only be made available in the future if the State Commission files the requisite certification pursuant to § 54.314.

The certification required for rural carriers to receive federal universal support for all four quarters during calendar year 2009 is currently due to be filed with the FCC and USAC on or before October 1, 2008. The certification may be presented to these entities in the form of a letter from the State Commission. The letter must identify which carriers in the state are eligible to receive federal support during the 12-month period and must certify that the carriers listed will only use the support for the provision, maintenance, and upgrading of facilities and services for which the support is intended.

On May 29, 2008, the South Dakota Public Utilities Commission (Commission) received a filing from Midstate Telecom, Inc. (Company) regarding its Request for Certification Regarding its Use of Federal Universal Service Support. The purpose of this filing was to provide information constituting Company's plan for the use of its federal universal service support and to otherwise verify that Company will use all federal universal service support received in a manner that is consistent with the federal universal service provisions of 47 U.S.C. § 254. The Company complied with the certification requirements as listed in ARSD 20:10:32:52 and 20:10:32:54. One of these requirements regards the Company's service quality improvement plan. This plan must include an explanation of how much universal service support was received and how it was used to improve service quality, signal quality, coverage, or capacity.
